

## Clues to Deceit: A Practical List

Clues to Deceit: A Practical List is based on Joe Navarro's work as a former FBI Special Agent and member of the FBI's elite Behavioral Analysis Program. This is a practical guide for anyone who is interested in detecting deception, written by the author of the international bestseller, *What Every Body is Saying*. This is an easy-to-use short guide with a list of over two hundred of the most frequently seen behaviors associated with deception. It is intended for anyone who asks questions to get at the truth or who conducts due diligence. That includes human resource personnel, managers, school administrators, social scientists, law enforcement personnel, students, parents, insurance representatives, or attorneys. This work is not meant to be an investigative manual but rather a quick reference for those who do interviews and would benefit from a ready list of behaviors associated with deception, the concealment of information, hidden issues, or guilty knowledge. It was written with that purpose and intent in mind. Never before have so many key behaviors been gathered together in such a practical way? starting with the head all the way down to the feet. This guide was designed to be easy to use and also easy to access on your smartphone, iPad, iTouch, Kindle, or any other E-reader device. Now you can have this information, developed by world class interviewer and body language expert, at your fingertips any time. Whether it's the forehead, the eyes, the nose, the lips, the shoulders, the neck, the torso, the hands, the thumbs, or the feet all the behaviors associated with deception, stress, hidden knowledge or issues can now be quickly accessed as never before.
