

## WindSwept Narrows: #1 Samantha Elliott

The WindSwept Narrows. A new social experiment about to be created by people with money and a social conscience. The more people drawn in, the larger things grow. Logan Sheffield didn't look at the name plate outside the room he'd chosen to live in while the resort casino was being finished. He didn't think twice before taking off at a dead run when he heard the scream and the gunshot. And he refused to hear the conscience warning him about rescuing redheads from the beach. Please - remember that this is part of a long, exciting series of friendship and romance. It might not end where you like, but it will continue in the next enticing segment. Follow along in the journey. Enjoy!
