

Solar Desalination for the 21st Century: A Review of Modern Technologies and Researches on Desalination Coupled to Renewable Energies (Nato Security through Science Series C:)

This book of the NATO Science Series presents the state-of-the-art of Desalination Technologies driven by Renewable Energies, highlighting the results achieved in the research field and presenting the potentialities of such technologies. It provides an up-to-date point-of-reference on the topic, giving an extensive overview of the current status of solar desalination, both from the research and industrial point of view.
