

Education: An Essay and Other Selections (Classic Reprint)

Excerpt from Education: An Essay and Other Selections Progress in educational theory has been so rapid in recent years, and changes in school-room practice have been made with such frequency, that many parents and teachers have failed to grasp the meaning of the new movements in education. This is not a matter for blame; it is characteristic of any period of transition such as ours. As we have become conscious of the need of modifications in our school system to meet changing social conditions, we have attempted a welding of new ideals to old traditions, with the inevitable result that not a little waste and confusion have attended the administration of our schools.
