

# Financial Statements: A Step-by-Step Guide to Understanding and Creating Financial Reports

Financial Statements is a perfect introduction to financial accounting for non-financial managers, stock market investors, undergraduate business and MBA students, lawyers, lenders, entrepreneurs, and more. Most introductory finance and accounting books either fail because they are written by accountants for accountants or the authors dumb down the concepts until they are virtually useless. Financial Statements deftly shows that all this accounting and financial reporting stuff is not rocket science and that anyone can understand it! Thomas R. Ittelson is a scientist, businessman, author, and teacher with many years of hands-on experience in business development and marketing for technical companies. As a consultant to entrepreneurs, Ittelson has written business plans and prepared financial projections that have helped raise more than \$500 million in start-up equity capital.
