

Flying High: Remembering Barry Goldwater

William F. Buckley Jr.'s first political book in nearly two decades is a revealing memoir of the first champion of the conservative movement. If any two people can be called indispensable in launching the conservative movement in American politics, they are William F. Buckley Jr. and Barry Goldwater. Buckley's *National Review* was at the center of conservative political analysis from the mid-50s onward. But the policy intellectuals knew that to actually change the way the country was run, they needed a presidential candidate, and the man they turned to was Arizona Senator Barry Goldwater. Goldwater was in many ways the perfect choice: self-reliant, unpretentious, unshakably honest and dashing handsome, with a devoted following that grew throughout the 50s and early 60s. He possessed deep integrity and a sense of decency that made him a natural spokesman for conservative ideals. But his flaws were a product of his virtues. He wouldn't bend his opinions to make himself more popular, he insisted on using his own inexperienced advisors to run his presidential campaign, and in the end he electrified a large portion of the electorate but lost the great majority. *Flying High* is Buckley's partly fictional tribute to the man who was in many ways his alter ego in the conservative movement. It is the story of two men who looked as if they were on the losing side of political events, but were kept aloft by the conviction that in fact they were making history.
