

Homeland Insecurity: Aliens, Citizens and the Challenge to American Civil Liberties in World War II

Set in World War II, but with an eye to the present and future, *Homeland Insecurity* offers a unique, thematic commentary on the experiences of men and women of Italian and German ancestry who were relocated, interned or excluded. Award winning author Stephen Fox mines government documents especially those of the FBI and Immigration and Naturalization Service to analyze the impact on detainees and their families of profiling, FBI bungling, military commissions, secret arrests, suspension of due process and habeas corpus, deportation, extraordinary rendition, second-class citizenship, and other forms of harassment. *Homeland Insecurity* showcases the selective embrace of historical lessons. During the war, policymakers, the media, and the public chose only the message that supported their assumptions. When this lack of judgment coincided with the prejudices and insecurities of J. Edgar Hoover and Franklin Roosevelt, the result was tragic: an assault on the Bill of Rights, the ruin of countless reputations and family well being, and lost lives. Told through intimate stories of men and women of European ancestry, *Homeland Insecurity* requires readers to ask whether this assault on constitutional and civil liberties is being repeated presently or will be repeated in the future.
