

Por que amamos? (Why We Love. The Nature and Chemistry of Romantic Love) (Spanish Edition)

In this groundbreaking exploration of our most complex and mysterious emotion, renowned anthropologist Helen Fisher explains why this experience-which cuts across time, geography, and gender-is a force as powerful as the need for food or sleep. With new research, Fisher shows exactly what you experience when you fall in love, why you choose certain people, and how love affects your sex drive and feelings of attachment. Description in Spanish: Provocador, convincente y revelador, este libro ofrece respuestas nuevas a cuestiones tan antiguas como por que nos enamoramos?, ¿que es el amor?, de que forma podemos mantenerlo vivo? En Por que amamos, la antropologa norteamericana Helen Fisher ofrece una nueva vision de este fenomeno universal basada en un novedoso estudio cientifico. Junto a un equipo de investigadores de diversos campos, consiguio demostrar que cuando uno se enamora, se encienden unas zonas concretas del cerebro por un aumento del flujo sanguineo.
