

Leading Instructional Rounds in Education: A Facilitator's Guide

Instructional rounds is a powerful form of professional learning aimed at helping schools and systems develop the capacity to educate all children to high levels. In this practical book, Thomas Fowler-Finn, an experienced consultant who has worked closely with the Harvard team that pioneered instructional rounds, discusses how facilitators can skillfully guide a network of educators through the rounds process. He shows how to scaffold participant learning, model effective teaching practices, and gradually transfer agency to the network. *Leading Instructional Rounds* is an invaluable resource for advancing the work of all facilitators, whether novice or experienced.
