

## Completing Your Search For Enlightenment

The attainment of enlightenment is not difficult. You do not have to be born with a destiny to become enlightened. You do not need to sit in a Himalayan cave for twenty years or study with a guru for thirty. It does not take discipline, hard work, hours of meditation, or attainment of mystical experiences or powers. It is neither experiential nor attainable. It is only realizable. Advaita is the name of the 5000-year-old path to enlightenment. It means not two. It is also known as non-duality. Now a focused and accelerated direct path for modern man is available. When you are ready to bridge the gap between the conceptual and non-conceptual knowingness, this accessible guide is available to all who have a burning desire to awaken to the here and now. This is not about adopting a new set of beliefs. It is beyond belief, because belief is not necessary once you reach non-conceptual knowing.
