

Kissinger: 1923-1968: de idealist (Dutch Edition)

Geen Amerikaans staatsman werd ooit zo bewonderd of gehaat als Henry Kissinger - ook wel bekend als de onmisbare man. Iedere president, van Kennedy tot Obama, won tot nu toe zijn advies in. Zijn tegenstanders schilderen hem echter af als amorele, ijsskoude aartsrealist. In dit eerste deel van zijn meesterlijke tweedelige biografie - gebaseerd op Kissingers tot dusver gesloten prive-archief en documenten uit ruim tweehonderd andere archieven in de hele wereld - rekt briljant historicus Niall Ferguson voorgoed af met dit beeld. De eerste helft van Kissingers leven wordt doorgaans samengevat als het schoolvoorbeeld van de Amerikaanse droom. Hij kwam als joodse vluchteling uit het Duitsland van Hitler naar Amerika, maar klom uiteindelijk op tot adviseur in het Witte Huis. In Kissinger - De idealist laat Ferguson zien dat Kissinger al opmerkelijke prestaties leverde ver voordat hij door Nixon tot Nationaal veiligheidsadviseur werd benoemd: als soldaat in de Slag om de Ardennen, als een van de bevrijders van een concentratiekamp, als ondervrager van nazis en als student aan Harvard. Kissinger - De idealist is het verhaal van een van de voornaamste strategische denkers in de VS. Deze biografie is tevens een politieke Bildungsroman waarin wordt beschreven hoe Kissinger adviseur en vertrouweling werd van een man die hij altijd had verafschuwd. Niall Fergusons verslag van een uitzonderlijke levensloop werpt een nieuw licht op een tumultueuze periode uit de wereldgeschiedenis: de Koude Oorlog.
