

Not by Accident

Samantha Dunn used to live for the feeling of wind blowing in her hair and the powerful intoxication of her horses steady gallop. A tug of Harleys leathery reins could instantly eradicate mounting bills, unfinished work, and the reality of a troubled marriage from her mind. But one day, as she was leading Harley across a stream in a picturesque California canyon, he panicked, knocked her to the ground, and trampled her?nearly severing her leg in the process. Dunn had always been accident prone?but in the aftermath of this incident, she began to analyze the details of her life and her propensity for accidents. Was she really just a klutz? Or could there be some underlying emotional reason she was always putting her life in danger? A blend of personal narrative and of research about what drives some people to have more accidents than others, *Not by Accident* is an insightful, incisive memoir that helps bridge the gap in understanding that exists on the concept of accident proneness.
