

# Teaching Science for All Children: Lessons for Constructing Understanding, Second Edition

This book is composed of lessons, activities, and teaching materials to meet the goals of elementary and middle school science. This book is derived from Part IV of the successful third edition of Teaching Science for All Children. Intended for both pre-service and practicing teachers, the book provides a wealth of lessons and activities that follow the learning cycle. The two introductory chapters provide information on the learning cycle, specifically the 4 Es - exploration, explanation, expansion, and evaluation - and on science safety. Each lesson is then matched to specific grade levels according to the National Science Education Standards. For pre-service and in-service teachers at the elementary and middle school levels.
