

# Gods Blueprint: Scientific Evidence that the Earth was Created to Produce Humans

Gods Blueprint is the boldest statement yet by the popular investigator of the past, Christopher Knight. While he sees a role for all religions he has none himself, yet Knight makes the case for a deliberate design to the human universe using detailed astronomical data. Surprisingly, most scientists already accept the basic notion of a God but because they require factual, checkable evidence, few have ever publicly supported the idea. But now new evidence has become available that provides hard-nosed evidence of Gods existence. Nothing less than Gods blueprint appears to have been discovered - found accidentally by the author while researching the science of the Neolithic (late Stone Age) people of Western Europe. Knight makes his case in a step-by-step manner, making you the jury. The evidence will be sure to surprise and delight you. The only questions that remains is, will scientists embrace the concept of a Supreme Creator, as they once did in Isaac Newtons day - and will theologians be prepared to look at new evidence that compliments their ancient scriptures?
