

Facts, Faith and Propaganda: Why You Should Consider the Evidence

Everything about who we are, how we came to be, and why we are here, is settled by faith. This book, written by a journalist who interviewed people on both sides of the argument, supplies evidence for faith in God--and reveals forgeries designed to destroy belief God as Creator, such as the Piltdown man, missing evolutionary links that DNAproved arent links, and a newer theory than Darwins, punctuated equilibrium. The author taught her first class on the Bible and science at age 25. She also studied extensively on the reliability of scripture and evidence for the Resurrection of Jesus, and took a college course in propaganda. She reveals her experience with the use of propaganda by secularists who spin the truth and attempt to brainwash Christians. You'll be surprised at this author's deduction of it all.
