

The Archer

Rocked to the core by traitors and spies, the Organization made an unprecedented move in bringing together six highly trained men to track down one rogue wolf: The Archer. There are three field agents: one at the top of his game, one hoping to retire, and another walking the line; a cold-blooded assassin who can use any weapon known to man; a demolitions expert who can't resist the allure of fire; and a computer hacker with more tricks in his mouse than Houdini. This team is made up of the best of the best, and if it can't succeed in this impossible mission, no one can. But no plan survives first contact with the enemy especially when you can't even find out who he is! Despite what a cluster the assignment is from the start, the six men try to get their act together to track down the rogue operative, and in the process they discover there's more to life than the next assignment. Now it's up to them to survive by working together and determining who the real traitor is: an unknown friend, a close-by enemy, or the Organization itself.
