

## The Ultimate Guide to Self-Directed Investing & Retirement Planning: Control Your Financial Future, Self-Direct Your Investments, Create a Tax-Free Bulletproof ... Wealth Plan, & Live the Life You Want!

The world of investing and retirement planning is confusing and cluttered, and ultimately rigged against you. Social Security is underfunded by trillions of dollars, investment companies are making billions even when the stock market is down, and the burden of retirement has shifted from companies and the government to the individual. The Ultimate Guide to Self Directed Investing & Retirement Planning is a no-nonsense guide on how we got where we are, why so few are winning at retirement, and what you can do to put the odds in your favor! Stop settling for plain vanilla advice that helped create the greatest financial crisis the world has seen, and start taking control of your finances and your future! Whether you are new to self directed investing, or are simply interested in the topic, this is the book to get you started! Jeff Barnes takes you deep into the rules and regulations of self directed investing and retirement planning for Generation X, Y, and Millennials, as well as Baby Boomers still looking forward to retirement. Using a self directed retirement plan such as an IRA (SDIRA), 401k (Solo 401k, Individual 401k, etc.), or other qualified plan, you will open up the entire investment spectrum and have nearly unlimited access to the best investment options available! Being a self directed investor is much more than simply going out on your own to create your ideal lifestyle. Instead, it is important to understand the rules and regulations of the governing bodies such as the IRS, SEC, DOL, and FINRA when setting up your self directed plan or self directed retirement plan. Once you understand the rules surrounding investing and self directed retirement plans as laid out in this book, you will be well on your way to creating true wealth and happiness in your life. As Jeff Barnes has been quoted saying, Retirement as we know it is dead! This has never been more true than our turbulent

economic and financial times that has literally changed the way investors plan and prepare for retirement. No longer can you rely on the government, pensions, or even your standard 401k plan to create your ideal retirement lifestyle. Instead, you need to hone your own investing skills so you can take advantage of the best opportunities available to build your wealth. Imagine investing in apartments, single family homes, or any other type of real estate...tax free! Just think how owning mineral rights, gas and oil partnerships, or private businesses could change your future! Not to mention saving thousands on taxes every year by structuring your plan just right! All of that and more is clearly laid out and explained in **The Ultimate Guide to Self Directed Investing & Retirement Planning!**
