Wallace Delois Wattles (1860-1911) was an American author. As a New Thought writer, he remains personally somewhat obscure, but his writing has been widely quoted and remains in print in the New Thought and self-help movements. Wattles often travelled to Chicago, where he gave Sunday night lectures among several leading New Thought authors. He studied the writings of Georg Wilhelm Friedrich Hegel and Ralph Waldo Emerson and recommended the study of their books to his readers who wished to understand what he characterized as the monistic theory of the cosmos. Wattles best known work is a 1910 book called The Science of Getting Rich in which he explained how to become wealthy. Table of Contents: The Science of Trilogy: The Science of Getting Rich, The Science of Being Well, The Science of Being Great. Other Works: Hellfire Harrison (A Novel), Jesus: The Man and His Work, A New Christ, How to Get What You Want, Making of the Man Who Can or How to Promote Yourself, New Science of Living and Healing or Health Through New Thought and Fasting, The Personal Power Course: Ten Lessons in Constructive Science. The Science of Getting Rich was a major inspiration for Rhonda Byrne's bestselling book and film The Secret (2006). In The Science of Getting Rich Wattles explains how can a person overcome mental barriers, and how creation, not competition, is the hidden key to wealth attraction. The Science of Being Well is not a philosophical treatise, but a practical guide and handbook for those whose main goal is health. The Science of Being Great is a personal self-help book of

the author. He is introducing us to a principle of power and showing us the immense effect of the power of positive thinking.
