

BLOOD, TOIL, TEARS, and SWEAT: The Speeches of Winston Churchill

Churchill not only ranks in the minds of many as the man of the century: he can lay fair claim to being its finest orator. There are various selections of his speeches, some of which are quite comprehensive (among them a series edited by Randolph S. Churchill, including *In the Balance: Speeches 1949-50, 1952*; and *Stemming the Tide: Speeches 1951 and 1952*, LJ 1/15/54), but this may well be the best. Certainly the choices made by Cannadine (history, Columbia) are judicious, but what sets the present work apart is his sparkling introduction. Written with a verve worthy of its subject, it gives a fine picture of Churchill as a speaker. Appropriately, the inspirational wartime messages take pride of place here, but the mans whole career is nicely represented. Essential for both public and academic libraries.
